

## Eurika® Coat 1228-FB

**Eurika® Coat 1228-FB** is a fully bio-based, water-based coating composed entirely of vegetable wax and unmodified natural polymers. When applied to paper or board, it provides **outstanding water resistance** (Cobb) along with exceptional **oil and grease resistance** (OGR).

Additionally, it features a **strong water vapor barrier** (MVTR), coupled with **anti-block properties** and **very good slip**.

Specifically formulated for completely **eco-friendly fiber-based packaging and wraps**, this coating significantly enhances the sustainability of all food and other packaging systems, as it is entirely **free from plastics and microplastics**.

### TYPICAL PROPERTIES

Appearance	Opaque white liquid
Solids type	Vegetable wax/natural polymer
Non-volatile content	29 - 31 %
pH	7,0 – 8,5
Viscosity (Brookfield, #3 at 60 RPM)	< 500 mPas
